📄 Meta Ad Performance Analysis – Business Requirements & Insights Document

---

📌 Business Objective

The objective of this project is to analyze and track the performance of advertising campaigns across Facebook and Instagram.
The dashboard provides visibility into campaign reach, engagement, conversions, and budget utilization to support data-driven marketing decisions.

📊 Scope of Analysis

In Scope:

- Facebook and Instagram paid ad campaigns

Out of Scope:

- Other platforms (Messenger, Audience Network)
- Organic (non-paid) engagement

📈 Key KPIs

- Impressions
- Clicks
- Engagements (Clicks + Shares + Comments)
- Purchases (Conversions)
- CTR (Click-Through Rate)
- Engagement Rate
- Conversion Rate
- Purchase Rate
- Total Budget & Avg Budget per Campaign

📊 Dashboard Insights

1. Funnel Performance

- High CTR (**11.76%**) and Engagement Rate (**13.56%**) indicate strong ad creatives and targeting

- Low Purchase Rate (**0.61%**) shows drop-off in the conversion stage
  👉 Insight: Strong awareness & engagement, but weak conversion efficiency

---

2. Audience Insights

- Females contribute **43%** of total engagement (higher than males)
- Highest engagement from **18–30 age group**
  👉 Insight: Core audience = young female users

---

3. Geographic Analysis

- High engagement from **India, US, Brazil**
- Potential high-value markets: **Germany, UK**
  👉 Insight: Separate strategies for high-volume vs high-value regions

---

4. Time-Based Trends

- Peak engagement during **afternoon & evening hours**
- Low engagement during early morning
  👉 Insight: Optimize ad scheduling for peak hours

---

5. Ad Format Performance

- **Video Ads** → Best performance (highest CTR, engagement, conversions)
- **Stories Ads** → Strong reach and engagement
- **Image & Carousel Ads** → Lower conversion efficiency
  👉 Insight: Allocate more budget to Video & Stories

💡 Final Recommendations

- Improve **conversion funnel** (landing pages, offers, retargeting)
- Focus on **target audience: females (18–30 age group)**
- Increase spend on **high-performing formats (Video, Stories)**
- Schedule ads during **peak engagement hours**
- Optimize campaigns based on **geographic performance**

🎯 Conclusion

The analysis highlights that while campaigns are highly effective in generating awareness and engagement, there is a significant opportunity to improve conversion efficiency. Implementing data-driven optimizations can significantly enhance overall campaign ROI
